### USES

<b>M-100 COOL ROOF WHITE</b>	A high-performance water-based 100% acrylic polymer coating exhibiting superior adhesion. A highly reflective, tough, durable, UV resistant finish coat with high elongation and tensile strength. Can be used over smooth and granulated asphalt surfaces, metal roofing systems, and existing acrylic coated roofs. Mildew resistant. Container sizes: 5 gallon pails and 55 gallon drums. UL Class A Fire Rated. ENERGY STAR® Qualified and Cool Roof Rating Council Rated: Solar Reflectance >80% and Thermal Emittance >.90
<b>M-200 GRAY BASE</b>	Gray Base Coat is equal to M-100 but tinted a light gray. Used as a base coat on “aged” asphaltic roof systems and metal roof systems. Provides contrast to ensure proper application of the M-100 finish coat. Available in 5 gallon pails and 55 gallon drums.
<b>M-500 MEGAFLASH™</b>	A trowel grade water-based proprietary 100% acrylic product for sealing seams, penetrations and flashings details. May be used with M-600 Series Polyester Fabrics for added reinforcement. Product contains no plasticizers or asbestos fibers. Available in 5 gallon pails and caulk tubes..
<b>M-600 POLYESTER FABRICS</b>	Used as a reinforcement medium in conjunction with seam sealers for sealing seams, curbs, penetrations and other details or as an the inter-ply reinforcement.
<b>M-700 GRAY BASE</b>	A thin viscosity, 100% acrylic polymer resin material for use over “new” asphaltic based roof systems and existing acrylic coated systems prior to the finish coat application. Promotes adhesion and fits small surface irregularities. Resists bleed-thru by integrating fresh oil leaching blocker. Provides contrast to ensure proper application of the M-100 finish coat. Available in 5 gallon pails and 55 gallon drums.
<b>M-800 METAL PRIMER</b>	A thin viscosity, acrylic material for priming metal surfaces after rust removal. Contains rust inhibitors. Water-based. Available in 5 gallon pails and 55 gallon drums.
<b>M-960 SKYLIGHT COATING (CLEAR)</b>	A milky white water based acrylic sealer for coating and protecting skylights. Available in 5 gallon pails.
<b>WC-190 WALL COATING</b>	A high performance, proprietary, water based, 100% acrylic co-polymer resin formulated finish wall coating product to waterproof concrete, masonry, EIFS, and metal walls. Available in 5 gallon pails and 55 gallon drums.
<b>WC-300 BRICK SEALER</b>	A clear, low viscosity, water based, 100% acrylic resin formulated. product which seals uncoated porous brick and split faced block surfaces. Available in 5 gallon pails and 55 gallon drums.
<b>WC-500 MEGAWALLFLASH</b>	Trowel grade, water based , 100% acrylic co-polymer resin material to repair cracks in concrete/masonry, EIFS and metal walls. Product contains no plasticizers or asbestos fibers. Available in 5 gallon pails.
<b>WC-900 WALL PRIMER</b>	A clear, low viscosity, water based , 100% acrylic resin formulated product which prepares uncoated porous or previously coated surfaces for the finish coating application of WC-190 wall coating. Available in 5 gallon pails and 55 gallon drums.
