

MEGA SYSTEMS

SYSTEM

SYSTEM OVERVIEW

COOL ROOF

M-100 Cool Roof White Reflective Coating saves energy costs by reflecting sunlight and reducing the roof surface temperature. Cool Roofs also extend the useful life of roof membranes by protecting the surface and reducing “Heat Aging” and Thermal Shock. UL Class A Fire Rated. ENERGY STAR® Compliant, LEED Positioned and Cool Roof Rating Council Rated and Licensed:

Solar Reflectance 86%
Thermal Emittance .90+

RECOAT EXISTING ACRYLIC

Re-coat the existing acrylic coated surface to reduce cooling costs and extend the useful service life of the roof membrane through the application of a highly reflective coating

BUR

Extend the useful service life of the aged or new asphalt built-up roof system and to reduce cooling costs through the application of a high performance reflective roof coating system.

MODIFIED BITUMEN ROOFS

Extend the useful service life of the aged or new APP or SBS modified bitumen membranes and to reduce cooling costs through the application of a high performance reflective roof coating system.

METAL ROOFS

Repair and coat the existing metal roof system to achieve a watertight roof system. Extend the useful life of the roof and reduce cooling costs through the application of a high performance reflective roof coating system.

WALLS (NEW & OLD)

Repair and coat existing or new vertical concrete, masonry, and stucco surfaces.

WARRANTEES

All MEGA materials carry a standard five (5) year material warranty. For extended, or material and labor warrantees, contact MEGA.
